

History page web Nov 2010

2009 A container was purchased and a Ute was donated and it was filled with building materials and sent to Saora Bible Collage to help with their upgrade of the Collage.

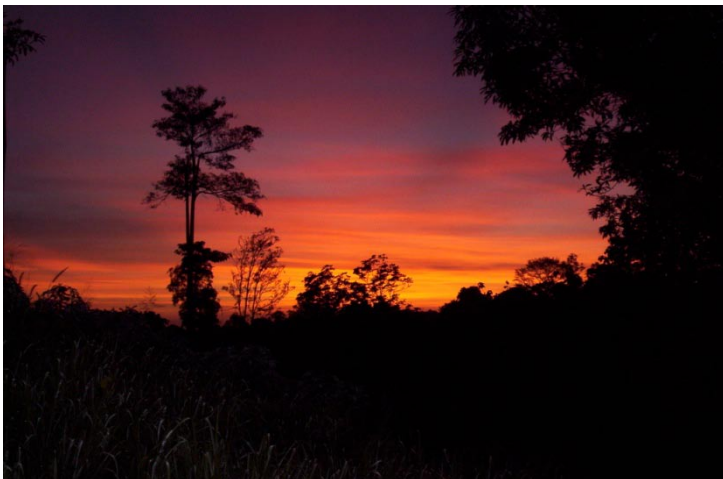

Container arriving.

A new floor was put in the classroom along with window frames

An 8 seat ablution block was built

So as the sun set on our trip we were praising God for what was achieved.

2010 We went with a small Team to build some cottages at Saora Bible Collage and while we were there put a small shed on the side of the container.
